

Voltage Sag Immunity Test (Semi F47)

Equipment under Test: TEX 120-112

EUT Serial No.: 3203301756

Customer Spec: 120WPP182

Date: 06/11/2020

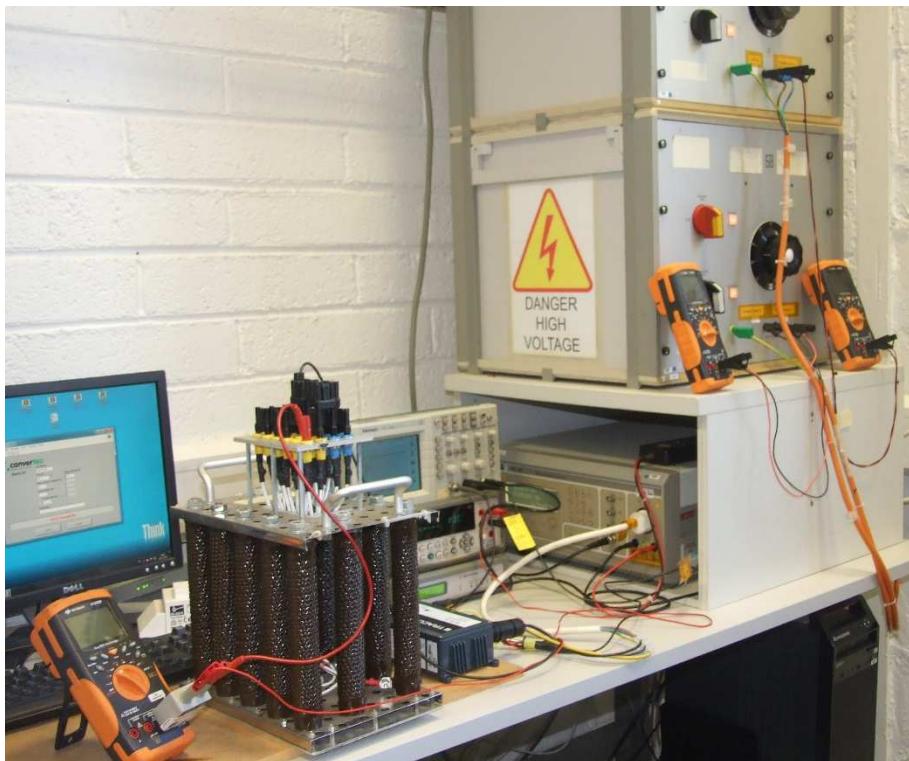

Standard: SEMI F47

Tester: Marie Doran, Traco Power Solutions Ltd

Notes:

- EUT tested under operating conditions of 230V and 115V 50Hz input at full nominal load (12V/8A Resistive).
- Test carried out using test generator using Voltage Sag Generator: Schaffner NSG1003: Dropout and Variation Simulator and Oscilloscope Tektronix: TDS2014C.
- Pass/Fail Criteria for Subsystems and Components-Voltage sag immunity testing of subsystems and components should meet the following as required by Semi-F47:
 - A. Performs at full rated operation.
 - B. May not perform at full rated operation but recovers operation without operator and/or host controller intervention. Must not send error signals to the equipment host controller indicating when full rated operation is not achieved.
 - C. May not perform at full rated operation but recovers operation without operator and/or host controller intervention. May send signals to the equipment host controller indicating when full rated operation is not achieved.
 - D. Does not perform at full rated operation and requires an operator and/or host controller intervention for recovering.

Conclusion:

The EUT meets classification A (Ref. SEMI F47). The test results were evaluated in relation to the Customer Specification 120WPP1XX and the EUT was considered to have PASSED the tests.

PASS
