

# Model: TIB 240-148\*

## EMC - Test Report for Radiated Emission acc. CISPR 16-2-3

This technical information is the property of Traco Power Solutions Ltd., and may not be copied or made available to third parties without permission. This information is copyright and all rights are reserved. Traco Power Solutions Ltd., Wexford.

**\*Also covers any models with EX designation**

It should be noted, that combining two or more CE compliant finished appliances does not automatically produce a compliant system. The manufacturer of an apparatus or a fixed installation as defined in the EMC Directive 2014/30/EU, 29 March 2014 is responsible for the EMC-compliance of the final apparatus.

## EMC - Test Report For Radiated Emission

### EUT Description

<b>Product Type:</b>	Standalone Power Supply		
<b>Model No:</b>	TIB 240-148		
<b>Manufacturers No.:</b>	240PSX185		
<b>Manufacturer:</b>	Traco Power Solutions Ltd. Whitemill Industrial Estate Wexford Ireland		
<b>Serial No:</b>	21804100032		
<b>Shipment No:</b>	First Samples		
<b>Nominal input:</b>	100-240Vac		
<b>Nominal output:</b>	48V 5A		
<b>Tested by:</b>	Shaun Foley	<b>Report by:</b>	Shaun Foley
<b>Date tested:</b>	09/07/2018	<b>Issue date</b>	17/07/2018
<b>Test facility:</b>	Traco Power Solutions Ltd. 3m Free Field Measurement Site Whitemill Industrial Estate Wexford, Ireland		

### Executive summary:

The EUT was tested for radiated EMC emission according following Standards

Standard	Result Pass/Fail
EN 55022:2010 - Class B Information technology equipment. Radio disturbance characteristics. Limits and methods of measurement	<b>Pass</b>
EN 55011:2009 + A1:2010 - Class B – Group 1 Equipment Industrial, scientific and medical equipment — Radio-frequency disturbance characteristics — Limits and methods of measurement	<b>Pass</b>

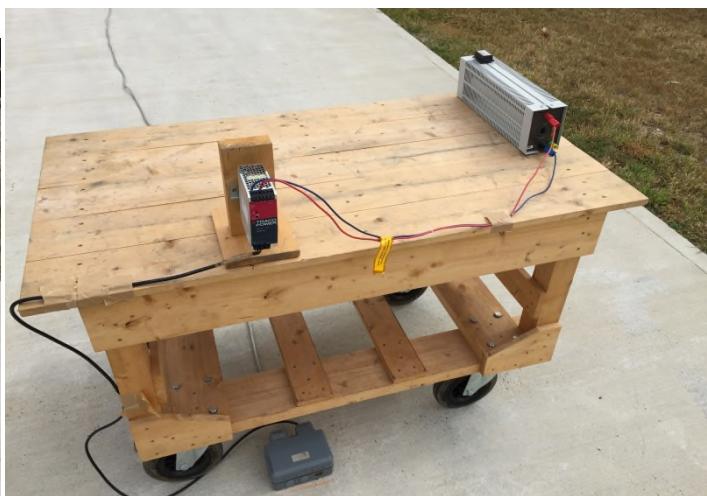

**Comment:** Highest emission appeared at full load

## Radiated Emissions

### Test setup:

The measurement was carried out in 3m Free Field Measurement site as outlined in CISPR 16-2-3. The Antenna and the EUT were setup at least 3m away from any surrounding object. The EUT was setup 0.8m above the ground. The EUT was connected to a resistive load and operated at its normal performance parameters.

Radiated Emission was measured with a Rohde & Schwarz EMI Receiver - ESVS 30 and a Teseq Bilog Antenna – CBL111D. Appropriate correction factors for the Antenna were applied. The antenna was mounted onto an antenna mast to enable measurement heights between 1 and 4 m. The resolution bandwidth of the Spectrum Analyser was set to 120kHz.

<b>Input Power Cable:</b>	2m	H05VV-F3G 1.0mm <sup>2</sup> - PVC isolated cable
<b>Output Power Cable:</b>	1m	2 x 16AWG wires - BS6231 tri rated PVC 105°C

The cable arrangement is in accordance to CISPR 16-2-3.

### Test procedure:

A pre-scan was first performed in order to find prominent radiated emissions. The points closest to the limit line were examined. For final emissions measurements at each frequency of interest, the EUT was rotated and the antenna height was varied between 1 m and 4 m in order to maximize the emission.

Measurements in both horizontal and vertical polarities were made and the data was recorded.

The “Margin” column of the following data tables indicates the degree of compliance with the applicable limit. For example, a margin of - 7dB $\mu$ V means the emission is 7dB $\mu$ V below the stated limit. The equation for margin calculation is as follows:

$$\text{Margin} = \text{Measured QP} - \text{Limit}$$

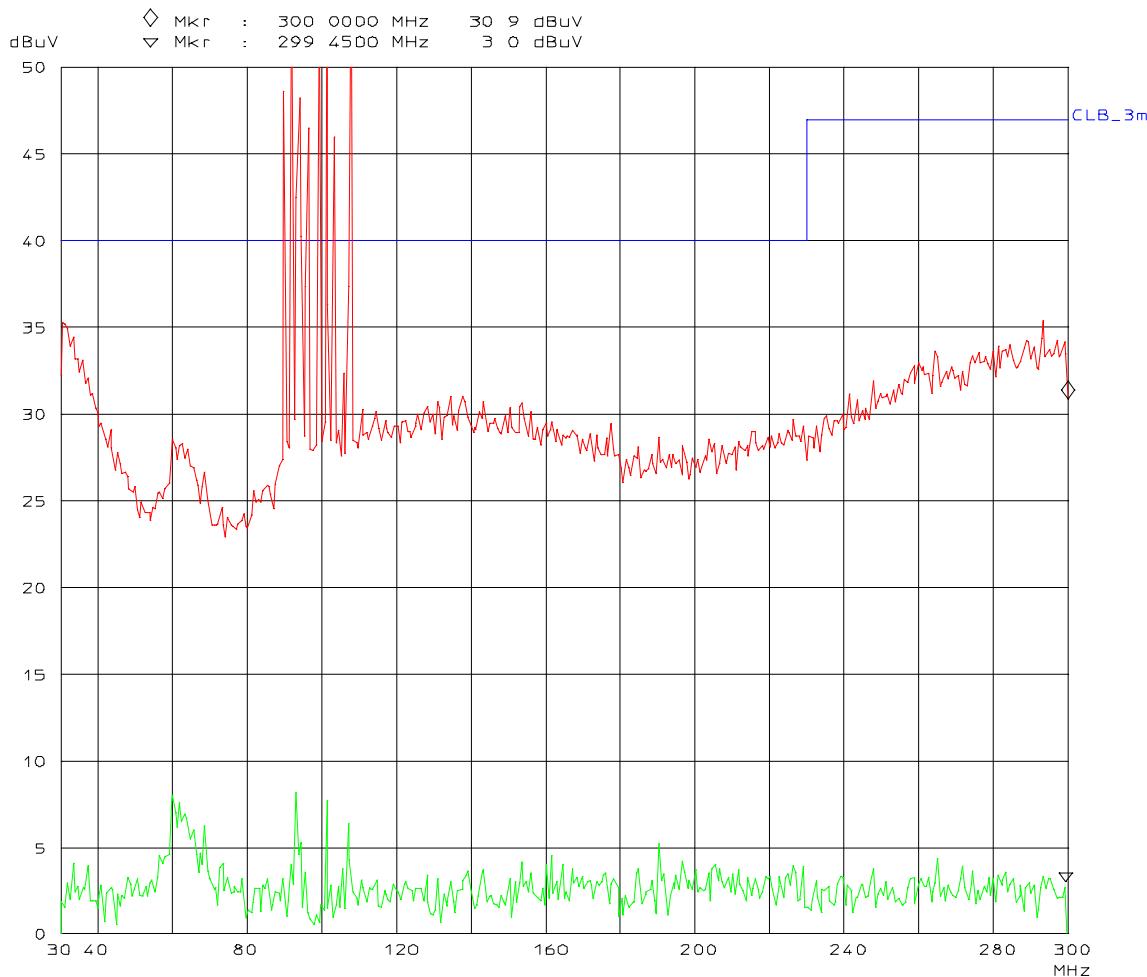

**Deviations:** None

**Input Voltage:** 230V/50Hz  
**Output voltage:** 48V  
**Load Current/Type of load:** 5.0A/ Resistive  
**Polarization:** Horizontal

## Appendix 1

### Ambient Radiation level

The ambient noise level was measured with the same receiver settings than for the radiated emission measurement. Any equipment in the close proximity was disconnected or turned off, including the EUT. The graphs below gives an indication of the constantly appearing radio broadcasting.

#### A1.1 Ambient radiation in Horizontal Orientation of the Antenna

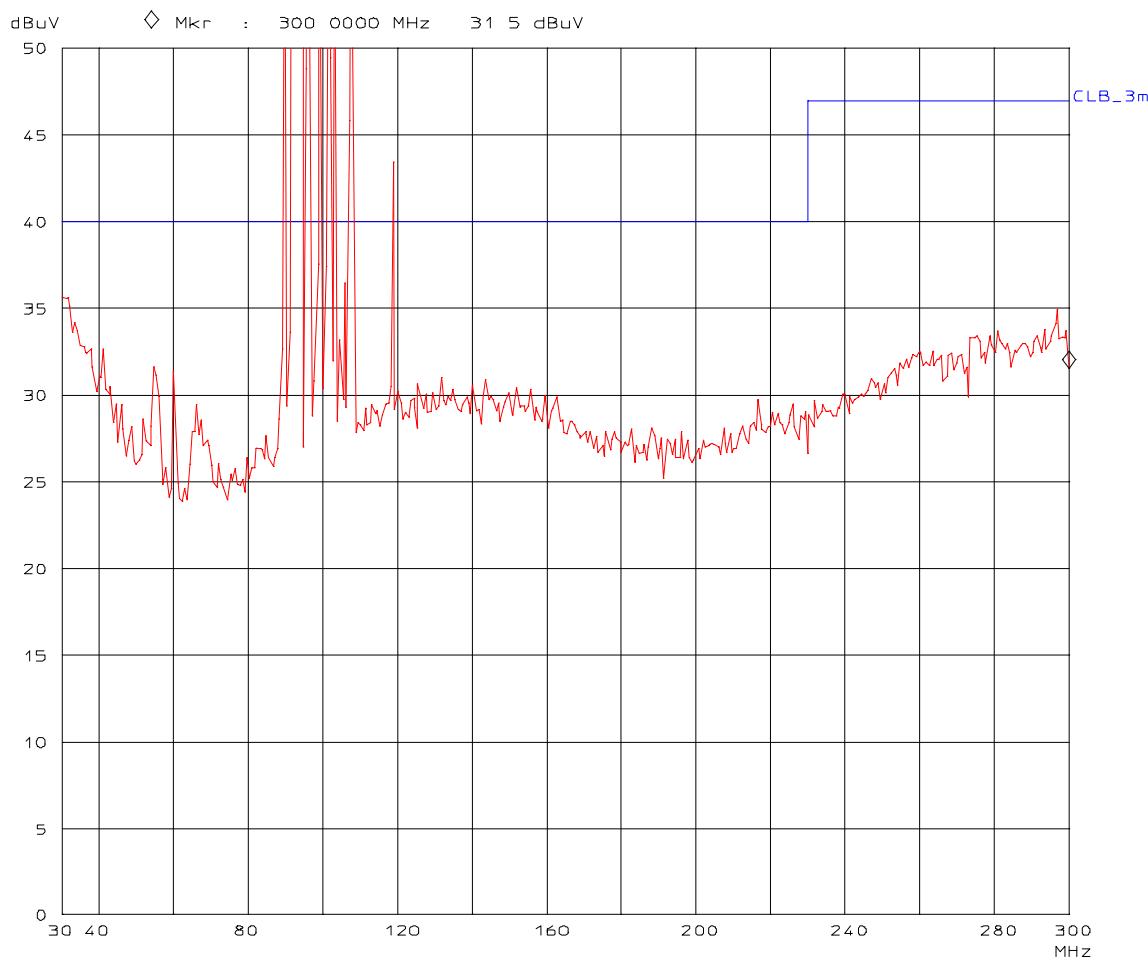

09. Jul 18 10:11

## A1.2 Ambient radiation in Vertical Orientation of the Antenna

09. Jul 18 10:14
