

Traco Power is a leading international supplier of power supplies for industrial applications and employs around 130 people in Switzerland, the USA, Germany, Ireland and France. Our products are primarily used in demanding industrial applications, in medical technology and in the transportation/rail transport sector.

A clear corporate strategy, technically and qualitatively superior products, long-standing, satisfied employees and a well-developed, global distribution network secure us a strong market position.

We are looking for reinforcement for our Field Application Engineer Team with immediate effect.

Field Application Engineer 80-100%

Office: Paris/France

Travel: trips for internal meetings (e.g., Switzerland, Germany, USA) and customer visits (mainly in Europe)

What you will be doing

- Build your own test-lab and establish local technical support for your colleagues and customers
- Provide technical support to the sales team in the field
- Act as a link between development, product management, sales, and customers
- Analyze customer applications and develop technical solutions
- Consult on topics such as EMC, temperature management, electrical and mechanical integration of power supplies
- Support design-in processes and assist customers via email, phone, web, and on-site
- Develop technical training and customer presentations
- Participate in sales events like trade shows and conferences
- Build and maintain customer relationships

What you bring to the job

- Degree in electrical engineering or a comparable qualification
- At least several years of experience in power electronics/hardware development, preferably in power supplies
- Strong knowledge of EMC/EMI and thermal cooling of electronic components
- Enjoy interacting with customers and strong communication skills
- Willingness to travel, mainly in Europe (20-50%)
- Advanced French knowledge, upper intermediate English knowledge, German is a benefit

What we offer

A secure, long-term and varied position with up to 2 days remote work.

- Flexible working hours, 35-hour working week
- 25 days holidays per year (1 day per month compensation for travelling)
- Choose your own equipment

Does that sound exciting to you? You can look forward to an inspiring working atmosphere and a collegial team. Your application is very welcome. Send us your complete application documents to bewerbungen@tracopower.com. Simona Carpinelli will be happy to provide you with further information.
