

Product Change Notification

Date July 26, 2022

No. 035-22

TRACO POWER TMW 36-112P

Ripple and Noise
(20 MHz Bandwidth)

To whom it may concern

The TRACO POWER Datasheet states this parameter has a specification of 195 mVp-p max. To consistently achieve this tolerance an external capacitor (0.1uF/50V recommended) should be connected across the output.

This parameter is typically 240mV without an external capacitor.

Timeline:

The product change is active for all models since production date 2022 CW19.

Additional Information:

Further documentation can be found on the corresponding product website: [TMW](#).
