The TMR 2WIN series is a family of isolated 2 W DC/DC converter modules with accurately regulated output voltages and ultra-wide 4:1 input voltage ranges. They require no minimum load and are protected against overload and short circuit.

An excellent efficiency along with the use of high grade components allows a compact construction in SIP-8 package. Even the converters can reliably operate in an ambient temperature of  $-40^{\circ}\text{C}$  to  $+75^{\circ}\text{C}$  at full load and up to  $90^{\circ}\text{C}$  with 50% power derating. Typical applications for these converters are distributed power architectures in communication, instrumentation and industrial electronics, everywhere where space on the PCB is critical.
