

End of Life Announcement

Date 07.06.2016
No. 014-16

TRACO POWER TEM 3 Series

To whom it may concern

An internal key component used for TRACO POWER [TEM 3 Series](#) (legacy 3 Watt DC/DC converter family introduced 1996) has recently become difficult to source by our factory, causing long delays and unreliable availability.

In consequence, TRACO is forced to declare the discontinuation of TEM 3 Series.

Factory production orders for TEM 3 Series are accepted until end of December 2016. Accordingly, customers are requested to place their Last Buy Orders to TRACO or its Distributors by December 15th, 2016.

Affected customers may perform replacement evaluation on following TRACO POWER Product Series: [TEM 3N](#) (pin-to-pin compatible with lower cost); [TEN 3N](#); [TEN 3WIN](#) or products with different output power.

We draw your express attention to the fact that the full compatibility of above replacement models and their suitability for the specific customer application have not been checked by TRACO and cannot be guaranteed.

The approval of the models is the sole responsibility of the customer.

The new or replacement models must therefore be checked accordingly in advance by the customer.

We thank you for understanding and apologize for any inconvenience caused.

Michael Bruderer
Head of international sales
