End Of Life Announcement, TRACO POWER THD15 Series

An internal key component used for TRACO POWER THD15 Series (legacy 15 Watt DC/DC converter family introduced 2004) has recently become difficult to source by the manufacturer, causing long delays and unreliable availability.

In consequence, TRACO is forced to declare the discontinuation of THD 15 Series.

Factory production orders for THD15 Series are accepted until end of December 2014. Accordingly, customers are requested to place their Last Buy Orders to TRACO or its Distributors by December 15. 2014.

Affected customers may perform replacement evaluations on following TRACO POWER Product Series: THN15; THD15N; TEN15; TEL15 or products with different output power.

Please note: before replacing a product model by another, adequate tests have to be run to ensure the full compatibility of the new model in customers application.

The customer alone is responsible for the approval of the replacement model.

We thank you for your understanding and apologize for any inconveniences caused.

Best regards,

Traco Electronic AG
