

End of Life Announcement

Date April 26th 2017
No. 021-17

TRACO POWER TMS Series

To whom it may concern

Several components used for TRACO POWER [TMS Series](#) (safety class I potted component AC/DC power modules in various form factors and termination styles, introduced 1999 and declared NRND in May 2016) have become hard to source, causing excessive delays and costs.

In consequence, TRACO has decided the discontinuation of TMS Series.

Factory production orders for TMS Series are accepted until end of December 2017. Accordingly, customers are requested to place their Last Buy Orders to TRACO or its Distributors by December 15th, 2017.

Customers affected by this discontinuation may look for TRACO POWER replacement at the dedicated category page [Encapsulated Power Modules](#) on the TRACO POWER website.

For further assistance you may contact your TRACO POWER distributor or directly approach the [TRACO POWER Marketing, Sales and Support](#).
