

## End of Life Announcement

**Date** March 7<sup>th</sup> 2023  
**No.** 045-23

### TRACO POWER TON 15, TON 15SM series

To whom it may concern

A crucial IC component used in the production for TRACO POWERs [TON 15\(SM\) Series](#) (introduced 2004) has become impossible to source due to its sudden discontinuation.

In consequence, TRACO POWER is forced to announce the End of Life (EOL) status **of all TON 15 and TON 15SM models.**

TRACO POWER was able to place a considerable last buy order of the affected IC (respecting shelf-life limitations) which under normal circumstances accounts for more than a year of sales to support customers with ongoing projects in the transition to a different solution. However, due to high demand the availability can't be guaranteed for this entire duration and component distribution within the series is crucial. Please contact your TRACO POWER distributor or directly approach the [TRACO POWER Sales and Support](#) to assess the situation for your ongoing projects.

Customers may also look for a TRACO POWER replacement at the dedicated category page [DC/DC DIP Converters](#) on our website or assess our recommendations below.

<b>TON 15 series</b>	<b>Potential Replacements (same pinouts)</b>
TON 15 series	<a href="#">TON 15WI series</a> (NRND) -> 4:1 input version of TON 15 series, same footprint  <a href="#">THN 15N series</a> -> 2:1 input, encapsulated 1x1" alternative
TON 15SM series	<a href="#">TON 15WISM series</a> (NRND) -> 4:1 input version of TON 15SM series, same footprint

We thank you for your understanding and apologize for any resulting inconveniences\*.
